## 7 Inch Full Touchscreen Analog Indoor Monitor Interface

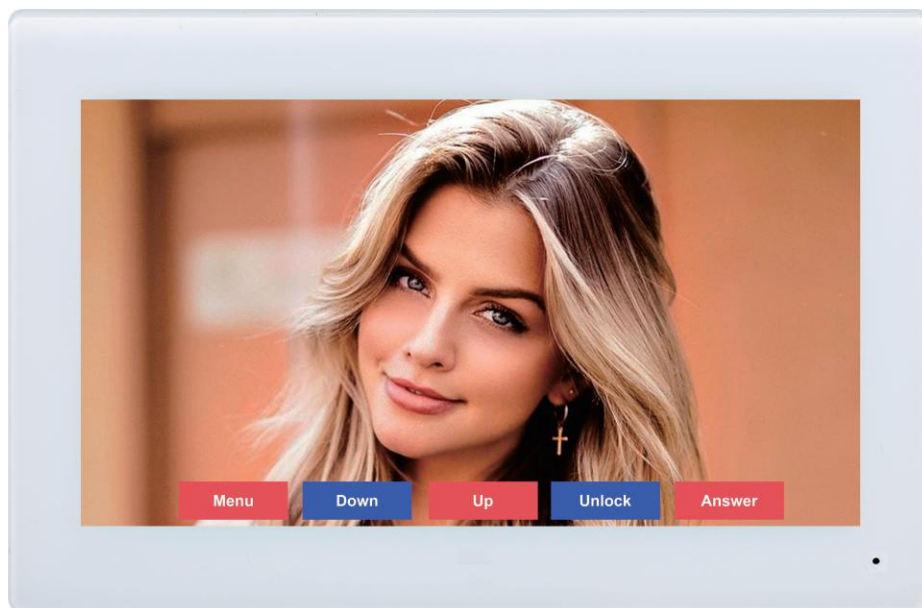

# Instructions

## Homepage

### 1. Answer the call

Press "Menu" to adjust brightness, chroma and contrast. Press "Answer" to talk with the visitor, and "Unlock" to open the door.

### 2. Monitor

To monitor the real-time image of outdoor station.

### 3. Call Guard

In IP-Analog system and a guard station is connected, call the guard station.

### 4. SOS

In IP-Analog system and PC management center is connected, When press SOS for 3s, the center will get the alarm.

## 5.Automation

Not supported.

## 6.Msg/Rec

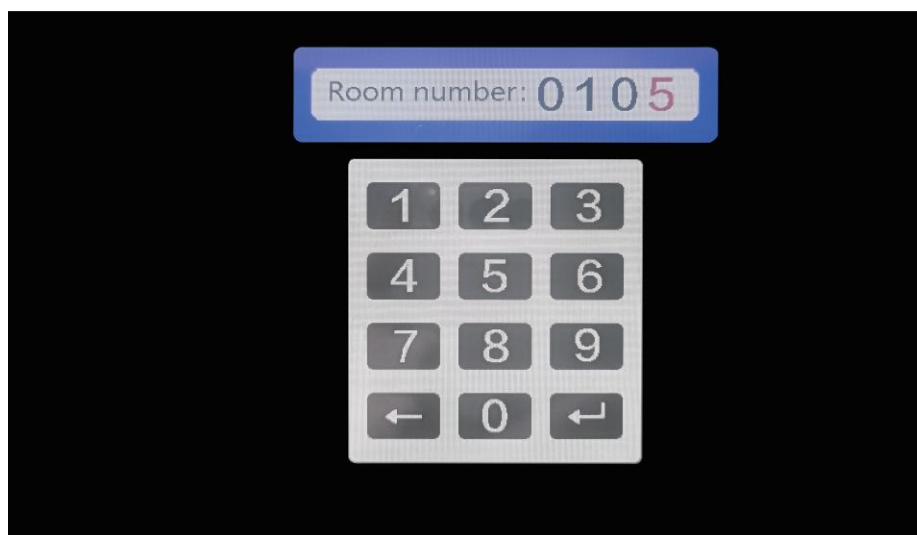

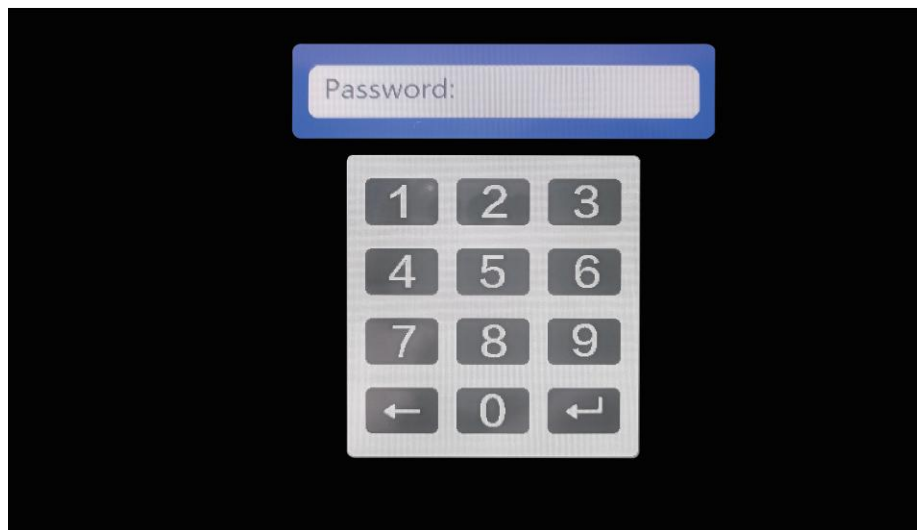

Not supported.

## 7.Call lift

In IP-Analog system, when outdoor station has been linked with lift system, press to call lift.

## 8.Setting

Password is “123456”. After that, input 4-digit room number and confirm.

## 9.Alarm

2 detectors can be connected. When the detector is triggered, the indoor monitor will alarm. If the system is in IP-Analog and the PC management center is installed, the center will also get the alarm.

# Specifications

---

## Indoor Monitor

- Display: 7-inch Color Full Touch Screen
- Material: ABS Plastic + PET
- Resolution: 1024\*600 Pixels
- Working Voltage: DC 12-24V
- Working Current: Less Than 500mA
- Working Temperature: -10℃-50℃
- Dimension: 190\*122\*18 (mm)
- Installation: Wall-mounted
