Functional Video

https://www.youtube.com/watch?v=yUDN0pigIWY

No.	Malfunction	Reason	Solution
1	Outdoor station can't call indoor monitor?	1.Indoor Monitor got reset 2.Network cable quality or different standard	"1.In ""Sys Set""-""Address"",set address as ""010101010101 2.Use a 568B standard and good quality network cable"
2	"Before installation , it was working well. But after installation, it can not be called?"	1.Network cable quality 2.Insufficient power supply voltage	"1.Use a good quality network cable 2.Use a power adapter with output DC18V-24V,if the network cable is over 40 meters"
3	"When visitor was calling, only one monitor is working"	1.Address is the same	"1.For example, the address of one monitor is ""010101010101"", and the address of another should be ""0101 01010102"". If there are more screens, then the address should be ""0101010 10103"", ""010101010104"" and so on."
4	Why can't open the lock?	"1.Don't use a power supply controller 2. Connect the wrong wire"	"1.Use a power supply controller to power and control the lock 2. Please get and check the wiring diagram or video from technical support"
