# Features

- 1. IP 10.1" color capacitive full touch screen Tuya / Smart life app indoor monitor
- 2. View wide angle 110°, night vision, IP 65 waterproof outdoor station
- 3. Video call, talk, intercom, room to room call, unlock
- 4.Connect with electric lock, keys to unlock, Mobile Tuya remote control visual unlock.
- 5. Support connect CCTV Camera by Onvif protocol
- 6. Monitoring & Snapshot photo or video when visitor calls
- 7. Photo and video records, support max 128G SD memory card
- 8. Support multiple call panels, multiple indoor monitors by POE switch
- 9. Open 2 doors

# 10.1 Inch Full Touchscreen IP Indoor Monitor Interface Display

# Add WIFI Tuya APP Connected with Mobile Phone Setting

#### **Steps 1**

The mobile phone should connect to the same WiFi as the monitor Then download "Tuya Smart"or"Smart Life-Smart Living" from Google Play or APP Store. And register and login in your account.

#### **Steps 2**

Open the software and click"Add Device", and it will search and pair device.

#### **Steps 3** When the WiFi monitor device is found, press "Add". And the device is being added.

#### **Steps 4**

In Intercom-Tuya-Scan code registration scan the QR code and wait for adding.

#### **Steps 5**

Waiting for it's done, then press "Done". Finally, device is added successfully.

# How to Share to Other Users

#### **Steps 1**

- 1. Log in your account on the app on other family members' phones.
- 2. Another way is to add their accounts on your APP (Up to 20 members).

Found"Me"---enter the"Home Management".

#### Steps 2

You need to "Complete Home Information" if you don't use Tuya or Smart Life before. Just name this family group like "myhome". And in"Home Settings", add family members.

Reset	Restore factory settings

## FAQ

NO	Malfunction	Reason	Solution
1	Outdoor station can't call indoor monitor.	<ol> <li>1.Indoor monitor got reset.</li> <li>2.Network cable quality or different standard.</li> </ol>	1.In "sys set"-"address",set address as "01010101010101. 2.Use a T568B standard and good quality network cable.
2	Before installation ,it worked well. After installation, it can't call successfully.	1.Network cable quality. 2.Insufficient power supply voltage.	1.Use a good quality network cable. 2.Use a power adapter with output DC18V-24V,if the network cable is over 40 meters.
3	When visitor was calling, only one of monitors is working.	1.Room number is the same.	1.For example, the address of one monitor is "010101010101", and the address of another should be "010101010102". If there are more screens, then the address should be "010101010103", "0101010 10104" and so on.
4	Why can't open the lock.	<ol> <li>Not use a power supply controller.</li> <li>Connect the wrong wire.</li> </ol>	<ol> <li>Use a power supply controller to power and control the lock.</li> <li>Please get and check the wiring diagram or video from technical support.</li> </ol>
5	Why the indoor unit can't connect to the APP?	1. The internet might not be good.	1. Try again when the network is stable.
