# FAQ:

NO	Questions	Reason	Answers
1	Why can't the Call Panel call the Indoor Monitor?	1.Incorrect wiring. 2.Poor wire connections.	<ol> <li>Verify wiring according to the system wiring diagram.</li> <li>Inspect all terminal connections.</li> </ol>
2	The Call Panel worked pre-installation, but now fails to call.	<ol> <li>Low-quality cable.</li> <li>Insufficient power supply voltage.</li> </ol>	1. Replace with a better cable.
3	Why does unlocking fail?	1. Incorrect lock wiring.	<ol> <li>Check lock wiring polarity.</li> <li>Install a dedicated access control power supply.</li> </ol>

If the issue persists, please contact our technical support team.
